PROFILE

I am an overly ambitious programmer with years of experience working on open-source projects in the Linux space. I started early on with my innovative project, risiOS that was loved by Linux press by innovating on top of Fedora Linux. I am now a college student working on a double major and a startup attempt. I am ready to use my coding and leadership experience to change the world.

WORK EXPERIENCE

Founder / Lead Developer, risiIndustries, Jan 2020 - Nov 2023
- Open-Source Development Group
- **Lead a team of developers, gained project management experience**
- Worked in several advanced **Python** and **Vala** codebases
- The main project, risiOS got 22 thousand downloads and an award from SourceForge, as well as positive press attention

Video Producer, Pine64, Nov 2020 – Mar 2023
